SIMPLIFY YOUR BUSINESS WITH THE CARGILL SPECIALTY CANOLA PROGRAM

5 STEPS TO HIGHER RETURNS

1. PICK YOUR VARIETY AND DELIVERY PERIOD

Choose your hybrids to get the agronomic benefits you prefer. Then, pick a delivery period, each with a valuable premium.

2. GROW YOUR CROP

Grow a winning crop of VICTORY® or InVigor® Health canola. Our fixed tonnage is set at 35 bushels/acre. Keep your eyes on the market – we offer a risk-free* price hedge and no-fee Futures First contract to our Cargill Specialty Canola producers. Cargill's experts will also be here to support you throughout the season.

3. SEND IN YOUR HARVEST SAMPLE

Submit a harvest sample from each of your Cargill Specialty Canola bins. We'll test your grain to ensure it meets our oil customer's quality standards.

4. RECEIVE ON-FARM PICKUP OF YOUR CANOLA FROM CARGILL

When your delivery period approaches, one of our select carriers will contact you to schedule the pickup. Our Full Load Last Load will help simplify your planning, helping you get more grain out the door at the end of the day.

5. CASH YOUR PREMIUM CHEQUE

Our premium price will contribute to your bottom line, and the high-oleic canola oil you grew will contribute to the health of consumers around the world.

Ready to join a team of growers taking performance to new levels? Sign up early to earn a **bonus** and an **instant seed discount** – check with your representative to see if you qualify.

*Contract terms apply.

¹ VICTORY® V25-ST was developed to be resistant to the predominant clubroot pathotypes identified in Western Canada at the time of registration. However, in a commercial field, there is potential for clubroot populations to exist or develop pathotypes to which V25-ST (and other clubroot resistant canola varieties) may be susceptible. Please follow integrated pest-management strategies to maximize the durability of genetic resistance in canola varieties. Learn more at www.clubroot.ca

² Co-op checks L233P and 45H33 (Based on mid-season zone production)

³ 2019 Cargill RST Trials across Western Canada; 6 locations. For reference, V14-1 matures 1 day later than Co-op checks 5440 and 45H29.
