

2023 VICTORY PERFORMANCE TRIALS

REDUCING RISK AND MAXIMIZING RESULTS

OUTPERFORMING LEADING COMMODITY CHECKS

In **VICTORY Performance Trials** managed by growers like you, **VICTORY V25-3T** returned on average more than **\$45** per acre over commodity checks, while **VICTORY V25-6T** returned on average more than **\$77** per acre over those checks.

VICTORY hybrids continue to be the best choice for strong yields and higher returns.

GROSS RETURNS (\$/AC)

LOCATION	V25-3T	V25-6T	COMMODITY*
BIRCH HILLS	\$1004	\$988	\$880

VICTORY ADVANTAGE	\$45.53	\$77.10	-

The Victory Canola Program is better than ever, offering:

SIMPLE PROGRAM

1. Pick your variety and delivery period
2. Grow your winning crop
3. Submit your harvest sample
4. Schedule on-farm pickup of your canola
5. Cash your premium cheque

HIGHER RETURNS

- ◆ Risk-free pricing
- ◆ Premium pricing
- ◆ Seed volume credit

STRONG GENETICS

Superior, high-yielding **VICTORY** hybrid options:

- ◆ **V25-3T**
- ◆ **V25-6T**

ADVANCED BLACKLEG PROTECTION

VICTORY hybrids come equipped with a durable, season-long polygenic blackleg resistance package which consists of multiple genes, with combinations of major and minor genes providing protection at every growth stage from seedling to adult.

VictoryCanola.ca.

*Average of 2 competitor varieties (DKTF 98 CR, and 45CM39) across 13 trial sites were used to calculate the average yield and gross return. VICTORY Performance Trials are calculated based on a commodity canola price of \$15.54/bu and a VICTORY canola price of \$17.35/bu. Individual results may vary.

¹ VICTORY V25-3T and V25-6T were developed to be resistant to the predominant clubroot pathotypes (2F, 3H, 5I, 6M, 8N) identified in Western Canada at the time of registration. However, in a commercial field, there is potential for clubroot populations to exist or develop pathotypes to which V25-3T and V25-6T (and other clubroot resistant canola varieties) may be susceptible. Please follow integrated pest-management strategies to maximize the durability of genetic resistance in canola varieties. Learn more at www.clubroot.ca

TruFlex[®] CANOLA Bayer is a member of Excellence Through Stewardship[®] (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. These products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from these products can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for these products.
